

AeroNT™

Propagation Plugs

TruRoot

AERONT™ FOR PROPAGATION OF CUTTINGS AND TISSUE CULTURE

AeroNT™ plugs are created by blending high-quality peat with coir fibers, perlite and a binder. This blend is a perfect medium for the propagation of cuttings under high humidity conditions, like propagation rooms.

The AeroNT™ plug can be used to propagate annuals, perennials, trees, vines and tissue culture. The unique formulation enables the AeroNT™ plugs to dry faster than most media but is easy to rewet.

The AeroNT™ trays arrive pre-filled and ready to use. The dibble (sticking) holes are pre-drilled and designed for cuttings. The AeroNT™ dibble holes are filled up with a fine loose substrate that guarantees an optimal contact of the cutting with the soil without compromising sticking speed.

ADVANTAGES

- Outstanding Drainage
- Easy Sticking
- Consistent Sticking Depth
- Faster Transplanting
- Optimized For Automation
- Excellent Contact With Cutting
- Quick Dry Down
- Easy Rewetting

STORAGE & HANDLING INSTRUCTIONS

Store out of direct sunlight in a cool dry location. As with any peat product, wearing gloves when handling is recommended. If the product is dry, a dust mask may be worn.

SHELF LIFE: 3 months when stored as directed. Monthly inspections recommended.

DISPOSAL: Please contact your local waste disposal facility for end-of-life options.

TECHNICAL DATA

Physical Properties

DESCRIPTION:

AeroNT™ plugs are created by blending high-quality peat with coir fibers, perlite and a binder.

- **PH:** 5.6 +/- 0.2
- **EC:** 0.8 +/- 0.2

APPLICATION:

AeroNT™ plugs are a perfect medium for traditional greenhouse production of cuttings under high humidity circumstances. They can be used to propagate annuals, perennials, trees, vines and tissue culture.

TO USE

- There is no preparation required before sticking, as sticking holes are pre-drilled and ready-to-use. Stick cuttings in the soft center. Mist AeroNT™ plugs immediately after sticking. Never pre-water AeroNT™ plugs.
