Lotus Cam Ranh – Cam Ranh, Vietnam
#1 New Course in Asia, 2018

Notable Project Quotes

"I've built greens with Profile for years and we never had one fail. Profile can take an average golf course superintendent and make them look like a hero. If you start with good soils it makes growing turf easier, and that's what Profile does."

-Andrew Johnston, General Manager / Director of Agronomy
Sentosa Golf Club — The Serapong, Singapore

"Our goal was to create the best agronomic conditions possible for Desert Forest. We feel that the addition of Profile Greens Grade to our root-zone mix, for example, was critical to our success. We have been really pleased with the end result and the way the greens have responded since we reopened."

-Todd Storm, Director of Agronomy
Desert Forest Golf Club, Carefree, AZ

"The Profile team was extremely helpful and passionate about finding a solution that could deliver the greens we desired..."

"The Profile team was extremely helpful and passionate about finding a solution that could deliver the greens we desired. Their team talked through everything and presented a few different options, tapping into experience they had on projects around the region, such as Dubai—which has a very similar climate to Jordan—to show how their solutions have performed with other courses."

-Charles Graham, On Course Project and Agronomic Consulting
Ayla Oasis Golf Club, Aqaba, Jordan

"We wanted a greens mix that would improve water-holding capacity, take the particle size distribution and get it where we need it to be, and we wanted to have a firm, fast mix. I think the PPC is one of those products that helps us check a lot of those boxes for what we want to create with regards to that greens mix."

-Jeff Corcoran, Manager of Golf Courses and Grounds
Oak Hill Country Club, Rochester, NY

"To be the best you have to start with quality products, and that's why I chose Profile. When you do a project like this, you really have to lean on others. It was very comfortable for me to lean on the experience and expertise of Profile."

-Shawn Emerson, Former Director of Agronomy
Desert Mountain Courses, Scottsdale, AZ

"Profile has played a very important part in developing healthy turf grass. Our choice to use Profile was a very sound decision in the end."

-Peter Todd, Estates Director
Royal Norwich Golf Club, Norwich, UK

"I strongly believe in what I've seen with these products. I wouldn't go down without a fight trying to convince the owners building a new golf course or new greens to really look into the cost and benefits of using Profile."

-Eric Bauer, Director of Agronomy
Bluejack National, Montgomery, TX
