

Double Down and Dominate

Create sustainable soil health and superior erosion control protection on the toughest sites when you pair ProGanics® Biotic Soil Media with Flexterra® High Performance-Flexible Growth Medium®: two powerhouse products that when combined create the two-spray ProFlex™ System.

Step 1 - Activate the Soil

Bring Depleted Soils Back to Life

A natural, sustainable and cost-efficient growing medium

Soil-building components and beneficial bacteria

Proprietary blend of Thermally Refined® bark and wood fibers

Step 2 - Protect the Soil

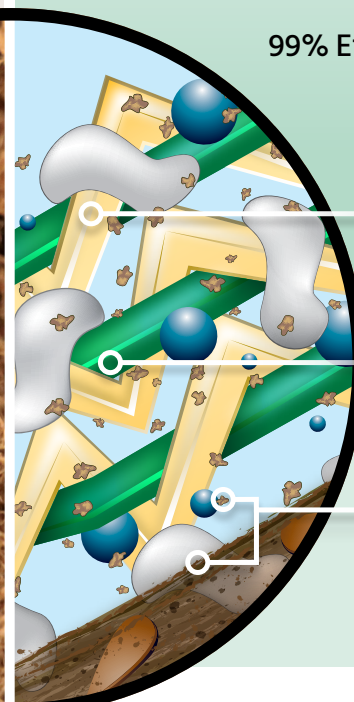

99% Effective Erosion Control

Crimped biodegradable interlocking fibers

100% recycled Thermally Refined® fibers

100% non-toxic biopolymers and water absorbents

The Ultimate Way to Improve and Protect Soil

Apply two of the industry's leading products and get the best of both worlds. ProGanics® Biotic Soil Media (BSM) and Flexterra® High Performance-Flexible Growth Medium® (HP-FGM®) are the highest-performing engineered solutions in their class.

ProGanics BSM

Lay the foundation for soil health with a fast-and-easy application of the world's most advanced engineered soil media.

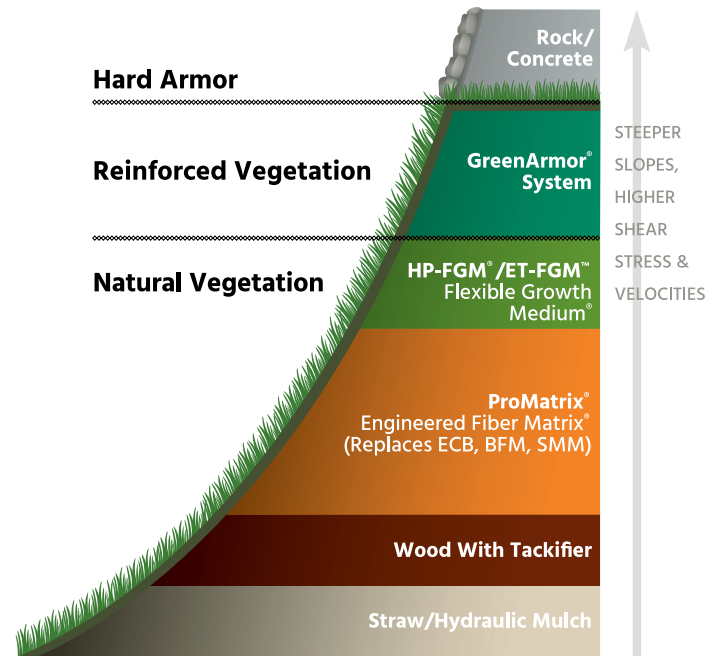

CONSIDERATIONS	ProGanics	Topsoil	Compost
Consistent Product	✓	?	?
Decreased Hauling Costs	✓	X	X
Readily Available / Easy Delivery	✓	?	?
Easy On-Site Storage	✓	?	?
Fast, Uniform Application	✓	X	X
No Substrate Mixing Required	✓	✓	?
Safe for Steep Slope Applications	✓	X	X
Introduces Organic and Biological Elements	✓	?	✓
From Renewable Sources	✓	X	✓
Wet or Frozen Conditions	✓	X	X
Weed Seed and Pathogen Free	✓	?	?
No Potential Harm to Human Health	✓	?	X

From difficult-to-access sites to residential developments and everything in between, ProGanics BSM sustainably establishes vegetation while expediting soil development. Not only is ProGanics weed seed and pathogen free, it's also ASTM Topsoil Spec (D5268-19) compliant and a proven solution for kickstarting root development and long-term sustainability.

- » Replace topsoil/compost
- » Revitalize stockpiled topsoil
- » Restore soils deficient in organic matter and biological activity

Flexterra HP-FGM

With the foundation in place, your next step is reinforcement. Add unrivaled protection and tackle steep terrain with Flexterra HP-FGM: our go-to solution for next-level erosion prevention.

Enhance vegetation establishment and prevent erosion control with Flexterra's proven strength and versatility. It's specifically designed to deliver the highest germination and growth establishment while also ensuring greater erosion control. When success is on the line, Flexterra is your best bet for protecting your ProGanics and avoiding costly do-overs.

- » 99% effective at controlling erosion
- » 1,700% Water Holding Capacity (WHC)
- » 800% germination improvement, cures instantly and lasts up to 18 months
