

Florikan®
Controlled Release Fertilizer

Sapphire

Polymer Coated Aluminum Sulfate

Guaranteed Analysis

Sulfur (S)*12.00%
12.00% Combined Sulfur

Derived From

Polymer Coated: Aluminum Sulfate.

ALSO CONTAINS NON PLANT FOOD

INGREDIENT(s): 7.2% Aluminum (Al)* derived from Polymer Coated Aluminum Sulfate.

*The aluminum sulfate in this product has been polymer coated to provide

12.0% coated slow release Sulfur (S).

NOTE: These rates are provided as a guide only. Specific rates will vary by region, media type, and performance requirements. Florikan recommends that you test this material on a small number of plants before applying to an entire crop to determine which rate is best suited to your location and conditions.

Do not apply if a heavy rain is expected.

Do not apply near water, storm drains or drainage ditches, or to any impervious surface.

Only apply to the intended application area.

Potential variables to be taken into account when choosing from the suggested rates.

Topdressing:

- Minimize contact of the fertilizer with the plant stem.
- With overhead irrigation it is always suggested that you spread the fertilizer over the entire surface of the growing media.
- With drip irrigation or spray stake irrigation ensure that the fertilizer is close to the emitter.

Low Rate: It is suggested that the low rate be used if-

- Plants being fertilized are in an area of reduced air flow (closely spaced plants, cold frame, greenhouse, etc.)
- Plants being fertilized are very young.
- Media pH is lower than 6.0.
- If flood irrigation or recycled irrigation water is utilized.
- If low volume irrigation methods are used (cyclic, no leaching of containers).
- If irrigation occurs less than 3 times per week- such as late winter/early fall.
- If peat based or other high water holding media are used.
- If Aluminum Sulfate has been applied previously in either granular or liquid form.

High Rate: may be consider if-

- Plants being fertilized are well established and are grown outside.
- Plants are being grown in a bark based media.
- Media pH is higher than 6.0.
- Irrigation occurs more than 3 times a week- such as late spring/summer

Florikan Controlled Release Al-SO₄ safely delivers aluminum sulfate to produce blue hydrangeas.

About FlorikanCRF

This product is a commercial fertilizer used as plant food in agricultural crop production or wholesale nurseries. For specific application rates follow the recommendation of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication or apply according to recommendations in your approved nutrient management plan.

DIRECTIONS FOR USE - FlorikanCRF™ should be applied according to soil or growing media conditions and the specific nutrient requirements of the crop being grown. It is recommended that a soil analysis is done prior to incorporation of FlorikanCRF™. If the soil or growing media is sandy, and loose with good drainage (low Cation Exchange Capacity), a higher rate of the product should be used. For heavier, clay-type soils (high Cation Exchange Capacity) a lower rate of FlorikanCRF™ should be used.

NOTICE - Warranty of this product, either expressed or implied, is limited to a guarantee of the composition as shown on the label in as much as uses are beyond the seller's control. For the same reason, seller is not liable for any injury to living things, crops, soils or materials which may result from the use of this product.

SKU: AL-SO4-180-GALX

U.S. STANDARD - NET WEIGHT 50 LB. (22.68 KG.)

Signal Word: DANGER

Hazard Statement: Causes serious eye damage

Precautionary Statement: Keep out of reach of children - read label before use & have label available should medical attention be needed - wear protective gloves & clothing/eye & face protection - if in eyes rinse and remove contact lenses - immediately call poison control
