

TURFACE ELITE MOUND CLAY

When the game is at stake, your mound and plate materials can't be the weak link. Turface Elite Mound Clay™ is a specialty clay blend formulated for professional-level performance in the most demanding areas of the field: pitching mounds and lanes, batter's and catcher's boxes.

Designed to maximize plasticity, stability, and resistance to wear, Elite Mound Clay delivers a firm, consistent surface that holds up under intense play and high traffic. It's built for facilities where safety, playability, and durability are non-negotiable, and consistent conditions are the expectation.

CONVENIENT, READY-TO-USE

Product is pre-moistened and screened for immediate installation.

MAXIMIZED PLASTICITY

Increases both stability and durability, essential in high-wear areas

CONSISTENT COLOR AND COMPOSITION

Deliver reliable performance with a minimum 60% clay content and uniform reddish-tan appearance

PERFORMANCE THAT STARTS WITH PLASTICITY

Plasticity measures a mound clay's ability to be shaped without cracking—and to hold that shape under stress and wear. It's a key indicator of both product performance and the amount of maintenance required to maintain a safe, playable field. In simple terms, it shows how reliable a mound clay is in real field conditions.

But plasticity only matters if it's predictable. That's why Turface Elite Mound Clay was developed and validated using Plasticity Index (PI) testing:

- **Elite Mound Clay** provides comparable performance to competitive products, with the added advantage of being ready to work out of the bag
- **Elite Mound Clay** has a lower moisture requirement to reach desired plastic state than competitive products, simplifying your moisture management efforts

THE RESULT

A mound clay that stays moldable longer, resists cracking, and makes moisture management easier to keep the fields safe and playable.

FULL CONSTRUCTION

MOUND AND PLATE RECOMMENDED QUANTITIES

FIELD	AREA	RADIUS	SIZE	QUANTITY*
Baseball	Mound	9'	10" Height	7 tons
	Homeplate	13'	4" Depth	12 tons
Softball	Pitching Circle	8'	4" Depth	5 tons
	Homeplate	10'	4" Depth	10 tons
Softball	Mound	5'	6" Height	3 tons
	Homeplate	10'	4" Depth	8 tons

*Quantity shown is approximate quantities only. Please call our office or contact your sales representative to discuss your unique situation.

MOUND MAINTENANCE

MOUND AND PLATE AREA RECOMMENDED QUANTITIES

	4" DEPTH	6" DEPTH
Table	11 bags	17 bags
Landing Area	20 bags	30 bags
Batter's Boxes	38 bags	58 bags
Catcher's Box	13 bags	20 bags
TOTAL	82 bags	125 bags

Number of bags may vary depending on the size of the mound and batter's box.
One pallet contains 40 bags.
One bag weighs 50 pounds. One bag covers 5 square feet x 1" thick (compacted).

IN THE GROUND

Incorporating Turface® into the soil of your natural grass fields reduces compaction and improves water- and air-holding capacity at the root zone.

ON THE GROUND

Improve field safety, stimulate recovery and absorb excess moisture by adding Turface to water-soaked fields.

BY YOUR SIDE

The Turface network of professionals can help you every step of the way, with information and tips on products, procedures and best practices
